Employer CAC Members

Dear Members:

Re: Health and Safety Excellence Program

Protecting the health and safety of all people working in Ontario is our highest concern at all times. The unprecedented nature of the COVID-19 pandemic requires Ontario's businesses to adapt their health and safety practices to protect their employees and customers and steer through this challenging economic environment.

The WSIB can help businesses improve their workplace health and safety during this pandemic and be ready for those that may come. Our [Health and Safety Excellence program](#) offers practical advice to help businesses stop the spread of COVID-19 and keep their people and our communities safe.

To highlight the program's [pandemic readiness](#) materials and topics, we are starting a special campaign that features an [association toolkit](#) you can use for communicating with your members. The toolkit features sharable information and graphics on how the program can help them navigate through the COVID-19 pandemic and build a more resilient, sustainable business.

In improving their workplace health and safety, businesses can help save lives, contain the spread of the virus, and contribute to the economic recovery of the province.

I encourage you to use the toolkit to circulate information about the program to your members. If you have questions, please contact [Diana Rea@wsib.on.ca](mailto:Diana_Rea@wsib.on.ca). Thank you for your ongoing partnership and valuable advice.

Sincerely,
